TRADE LIST OF
COLLECTED
NATIVE PLANTS

AND
HARDY PERENNIALS

GROWN BY
J. M. BASSETT
HAMMONTON, N. J.

U. S. A.

 TAKE PLEASURE in presenting herewith my Trade List of Collected Native Plants, of the Pine Barrens of New Jersey.

In collecting these plants and shrubs, I give careful personal attention to each order and take great pains to secure good stock---only such as will grow under average conditions.

In making up this list I have eliminated many items that do not take kindly to transplanting.

Introducing New Friends

And Information About Two Old Friends

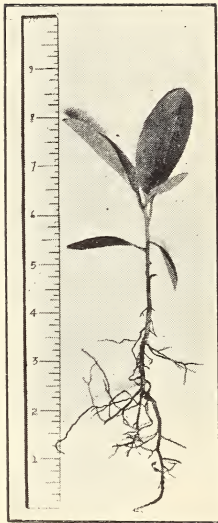

A plant that should be better known,

Cynachum Acuminatifolium

(Vincetoxicum Acuminatum) (Mosquito Plant.)

An unusual free flowering perennial, bearing clusters of white flowers in the leaf axils. Useful in the border, as individual specimen, and as a cut flower. Covers a long blooming period, and keeps well when cut. If the plant is cut back as soon as flowers are past, it will bloom again in late summer.

Strong plants, \$2.00 per dozen ; \$15.00 per hundred.

MAGNOLIA GLAUCA

(Sweet Bay)

The Swamp Magnolia of the Pine Barrens. Many people have the erroneous idea that this Magnolia will thrive only in moist soil. It will thrive in any garden and is quite easy to grow.

Seeds sown in the Fall will germinate the following Spring. The photograph herewith was made June 15th from seed bed.

2 yr. strong plants from seed bed, per 1000..	\$35.00
seed per lb.....	3.00
10 lbs... ..	25.00

1 year from seed

CENTAUREA MACULOSA

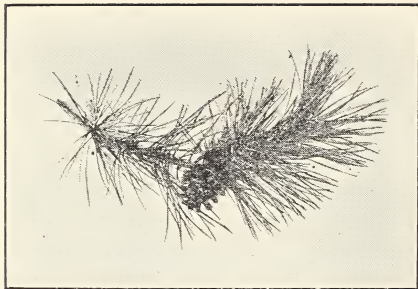

Grows 2 to 4 feet

A perennial of decided merit. The light lavender plume-like flowers are borne in great profusion from early June until frost.

If planted in the Autumn, small divisions will make a strong clump by Spring, and make a wonderful showing all Summer.

Strong divisions for Fall delivery.... \$6.00 per 100

Strong clumps for Spring delivery... 10.00 per 100

PINUS ECHINATA

(Short Leaf Pine)

The best of our native pines. It is quite distinct from the so-called Jersey Pine (*Pinus Rigida*.) The foliage is a rich green, dense and compact. The growth is rather tall and straight. It is well worth growing for timber as well as for landscape planting.

Collected seedlings pr 100, \$7.00 ; pr 1000, \$60

“ seed lb. 7.50

PINUS VIRGINIANA (Spruce Pine) (scrub pine) quite distinct, of shorter growth than the preceding, somewhat resembling spruce foliage, but will thrive in soil that is too sandy for spruce.

Collected seedlings per 100, \$7.00 ; per 1000, \$60.00

seed lb. 7.50
